

软件使用说明文档

实现的功能

默认连接使用网易 163SMTP 服务器进行邮件发送

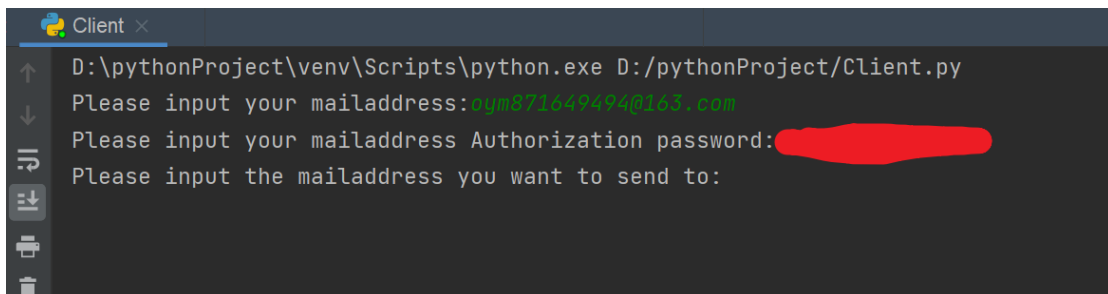

操作步骤

```
Client x
D:\pythonProject\venv\Scripts\python.exe D:/pythonProject/Client.py
Please input your mailaddress:qym871649494@163.com
```

A terminal window titled 'Client x' showing the execution of a Python script. The command prompt is 'D:\pythonProject\venv\Scripts\python.exe D:/pythonProject/Client.py'. The program prompts 'Please input your mailaddress:' and the user has entered 'qym871649494@163.com'.

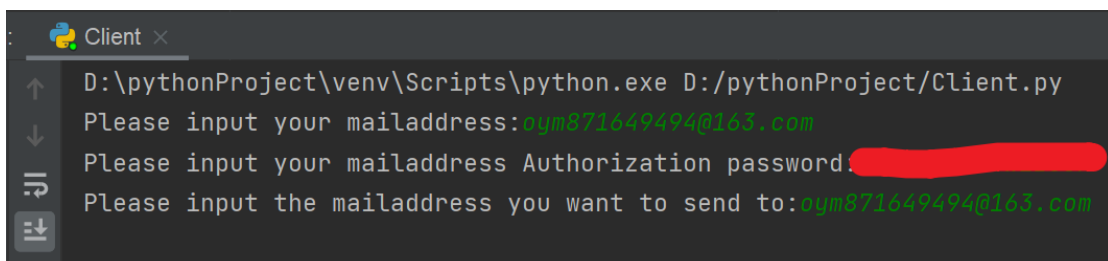

首先输入自己的 163 邮箱地址（作为登录用户名的同时也作为发送邮箱）

```
Client x
D:\pythonProject\venv\Scripts\python.exe D:/pythonProject/Client.py
Please input your mailaddress:qym871649494@163.com
Please input your mailaddress Authorization password:
Please input the mailaddress you want to send to:
```

A terminal window titled 'Client x' showing the next steps of the program. It prompts for 'Please input your mailaddress Authorization password:' and 'Please input the mailaddress you want to send to:'. The password input field is redacted with a red oval.

接着输入自己的 163 邮箱授权密码

```
Client x
D:\pythonProject\venv\Scripts\python.exe D:/pythonProject/Client.py
Please input your mailaddress:qym871649494@163.com
Please input your mailaddress Authorization password:
Please input the mailaddress you want to send to:qym871649494@163.com
```

A terminal window titled 'Client x' showing the final step of the program. It prompts for 'Please input the mailaddress you want to send to:' and the user has entered 'qym871649494@163.com'.

接着是收件邮箱地址

```
Client x
D:\pythonProject\venv\Scripts\python.exe D:/pythonProject/Client.py
Please input your mailaddress:qym871a49494@163.com
Please input your mailaddress Authorization password:
Please input the mailaddress you want to send to:qym871a49494@163.com

Server message after connection request: 220 163.com Anti-spam GT for Coremail System (163com[20141201])

Server response after HELO: 250 OK

Server response after AUTH LOGIN: 334 dXNlcm5hbWU6

Server response after sending username: 334 UGFzc3dvcmQ6

Server response after sending password: 235 Authentication successful
|
Server response After MAIL FROM command: 250 Mail OK

Server response After RCPT TO command: 250 Mail OK

Server response After DATA command: 354 End data with <CR><LF>.<CR><LF>

Please input your subject:SMTP Mail Client Testing
```

提示信息显示后输入待发送邮件标题

```
Client x
D:\pythonProject\venv\Scripts\python.exe D:/pythonProject/Client.py
Please input your mailaddress:qym871a49494@163.com
Please input your mailaddress Authorization password:HEYJWUWLSCWLICSR
Please input the mailaddress you want to send to:qym871a49494@163.com

Server message after connection request: 220 163.com Anti-spam GT for Coremail System (163com[20141201])

Server response after HELO: 250 OK

Server response after AUTH LOGIN: 334 dXNlcm5hbWU6
